

Early Adopter MPI für Psycholinguistik

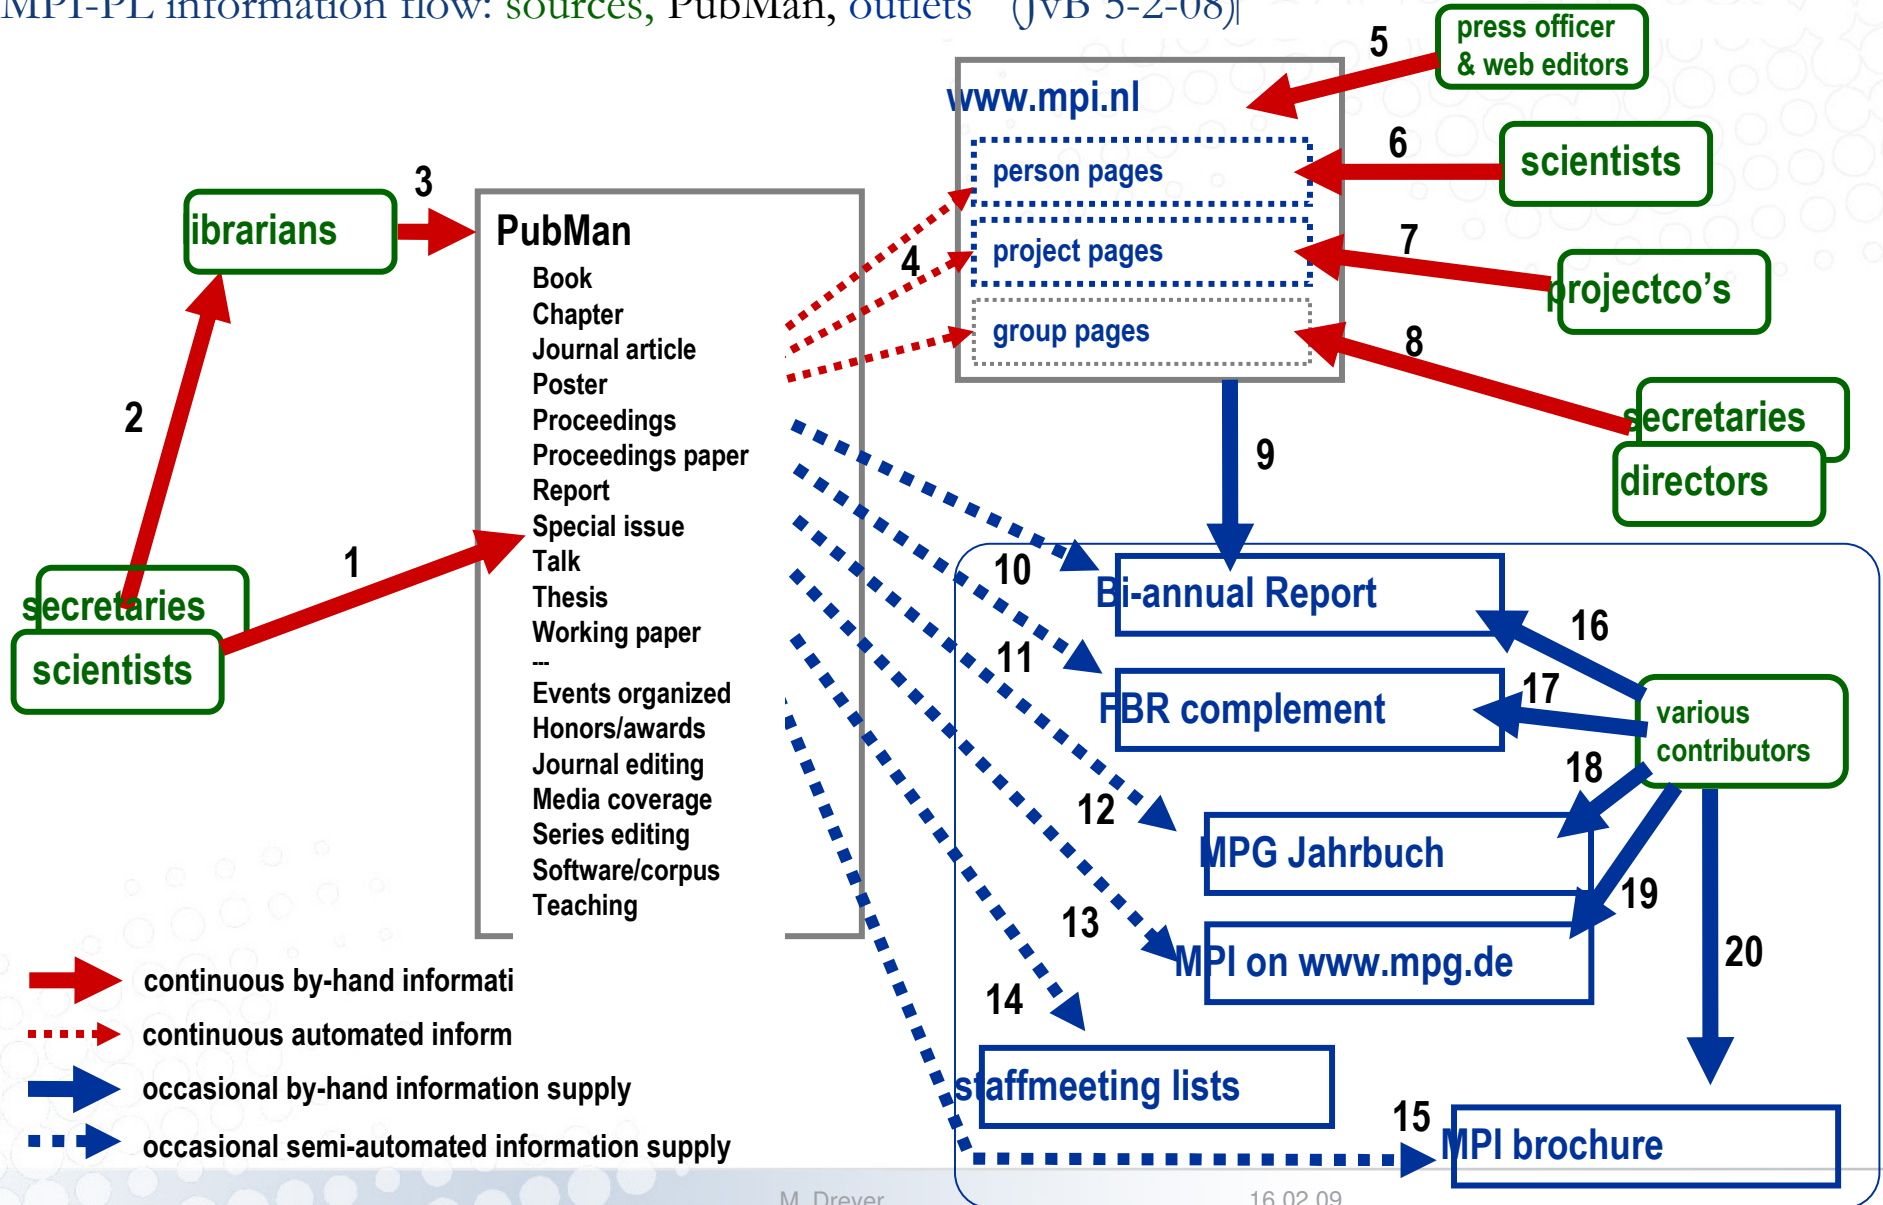

N. Kondic

Warum EA?

- Situation: Neue Webpage mit neuem CMS geplant
- Anforderung: Tool für...
 - Publikationsdatenmanagement
 - Bi-Annual Report
 - Jahrbuch der MPG
 - Publikationslisten für Webseite(n)
 - Vierteljährliche interne Staffmeeting Listen
- Alle Bedarfe bezüglich Publikationsdaten sollen aus einer Quelle bezogen werden
- Wissenschaftler sollen motiviert werden Daten selbst einzupflegen
 - Daher CMS und PubMan gleichzeitig am Institut einführen

MPI-PL information flow: sources, PubMan, outlets (JvB 5-2-08)

MPI-PL information flow:

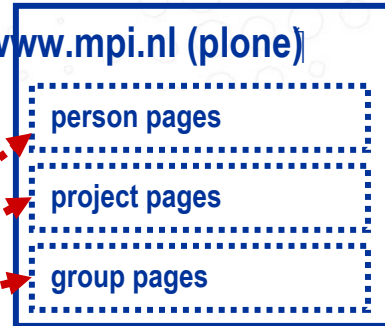

PubMan - Plone Interface (JvB 5-2-08)

www.mpi.nl (plone)

- PubMan**
- Book
 - Chapter
 - Journal article
 - Poster
 - Proceedings
 - Proceedings paper
 - Report
 - Special issue
 - Talk
 - Thesis
 - Working paper
 - ...
 - Events organized
 - Honors/awards
 - Journal editing
 - Media coverage
 - Series editing
 - Software/corpus
 - Teaching

PPI

Bi-annual Report

FBR complement

MPG Jahrbuch

MPI on www.mpg.de

staffmeeting lists

.....➔ continuous automated information flow

Beiträge/Anforderung PubMan

- Labels
- APA Zitierstil (Definition und „debugging“)
- Snippetformat
- Search&Export (Feeding local webpages)
- File locator, insbes. für supplementary material
- 1. Institut, das eDoc Daten auf PubMan migrieren wird
 - Mapping für OUs auf PubMan
 - Zuordnung von Personen zu OUs
 - Intensives Testen der Migration
- Teilnahme an Usability Interviews
- Intensiver Austausch und Zusammenarbeit mit Service Management und teilweise auch mit der Entwicklungsabteilung

Search&Export Service

Welcome at Max Planck Institute for Psycholinguistics

by admin — last modified Oct 01, 2008 09:08 AM

Oct 01, 2008 MPI for Psycholinguistics partner in the Donders Institute for Brain, Cognition and Behavior

September 1 is the starting date of the Donders Institute for Brain, Cognition and Behaviour. Within the DI-BCB, the MPI will closely cooperate with four other Nijmegen-based research institutes that study brain, cognition, and behaviour: the Donders Centre for Cognition (formerly the NICI), the Donders Centre for Cognitive Neuroimaging, the Donders Centre for Neuroscience, and the Behavioural Science Institute. The opening of the DI-BCB will be marked by a 1-day scientific conference -- Cognitive Neuroscience: From molecule to man -- on November 28, 2008, in Nijmegen. [more >](#)

Van Berkum, J. (2005). Anticipating upcoming words in discourse: Evidence from ERPs and reading times. Journal of Experimental Psychology: Learning, Memory, & Cognition.

We examined whether people can use their knowledge of the wider discourse rapidly enough to anticipate specific upcoming words as a sentence is unfolding. In an ERP experiment, subjects heard Dutch stories that supported the prediction of a specific noun. To probe whether this noun was anticipated at a preceding indefinite article, stories continued with a gender-marked adjective whose suffix mismatched the upcoming noun's syntactic gender. Prediction-inconsistent adjectives elicited a differential ERP effect, which disappeared in a no-discourse control experiment. Furthermore, in self-paced reading, prediction-inconsistent adjectives slowed readers down before the noun. Our findings suggest that people can indeed predict upcoming words in fluent discourse, and, moreover, that these predicted words can immediately begin to participate in incremental parsing operations.
