

CoNE – How to Add a New Vocabulary Developer Workshop PubMan Days 2010

Michael Franke (MPDL)

CoNE – Control of Named Entities

- REST web service at:
<http://localhost:8080/cone/>
- Model/vocabulary configuration:
<http://localhost:8080/cone/explain>

A New Model: Publishers

- Externalize models.xml
- Create a new model
- Enter data

- PubMan: add publisher autosuggest

Troubleshooting

- No results are shown where querying for the new vocabulary.
 - Check if at least one predicate is searchable
 - Check if result pattern exist and if they are filled
- Nothing is shown in the autosuggest list.
 - Check Firefox error console for javascript errors
 - Check source code for CSS class and autosuggest URL
