Dear Karin,

Moderators (Bibliothekare)

Verifizieren PubMan items, wir achten auf:

- Item im richtigen context?
 - MPI context= nicht unbedingt= mpi affiliation auf Publikation
- Person CoNE entry vorhanden?
 - Muss ausgewählt werden in mpi context aber bewusst nicht bei non-mpi context!
- Metadaten ok?
 - Proceedings geben (fast) immer Probleme
- Soll item released werden?
 - Submitted journal articles releasen oder nicht, local tag?
- Soll item auf interne publication list?
 - Local tag zuerkennen?

-> was würde uns helfen?

.....Anforderungen (an den Workspace) des Moderators

- Schneller
- Durchsuchbarkeit von submitted items
- Display:
 - Wer ist owner des items
 - Ist item neu submitted oder re-submitted
 - Ist item eine Dublette / gibt es ähnliche items
 - Visuell sichtbar machen, daß 'local tag' vorhanden
- Guter Export in Endnote und Zotero für Weiterverarbeitung für Listen

....Anforderungen an User Management

- CoNE entries für Personen am Institut regeln
- User anlegen, aktivieren, deaktivieren, reaktivieren
- User Präferenzen verwalten (gibt selber ein, will submitted items releasen....)

...Vorschläge

The screenshot shows a web interface for an item titled "Coercion and compositionality". The top navigation bar includes links: "View item", "Release History", "Revisions", "Item Statistics", "Item Log", and "Local Tags". The "Local Tags" link is circled in red, with an arrow pointing to it from a text box. The main content area is divided into sections: "Basic", "Files", "Locators", and "Creators". The "Basic" section includes a "Bookmark this item" link and a "Genre" of "Journal Article". The "Files" section lists a PDF file named "Baggio_Coercion_And_Compositionality_JOCN_2010.pdf". The "Creators" section lists four authors: Baggio, Giosuè¹, Choma, Travis², van Lambalgen, Michiel³, and Hagoort, Peter^{1,4,5}. The "Affiliations" section lists three institutions: 1. Unification, MPI for Psycholinguistics, Max Planck Society, Nijmegen, NL; 2. Radboud University, Nijmegen, The Netherlands; 3. University of Amsterdam, The Netherlands. Two text boxes with arrows provide suggestions for the "Local Tags" link.

...Verbesserungen für Depositor

- Collaboration Szenario: Schreibrechte für Co-Authoren – zB die Co-Authoren, die einen CoNE entry im gleichen context haben
- Person CoNE entry – Anzeige von ausgewählten affiliations

....Allgemeine bugs / Verbesserungen

- Advanced search: automatisch suchen in eigenen Contexten als logged in user
- Blättern in Journal list nicht immer möglich, zB. Suche nach Science
- Beim Verbessern eines CoNE entries mit zusätzlichen affiliations werden ALLE affiliations überschrieben (pubman-support:1590 u 606)
- Bei 'use as template' werden local tags mitgenommen..?
- Image pdf's -> metadaten werden nicht indexiert, mime-type workaround führt zu Problemen auf der Homepage
- Save search und save basket

...*Known 'bugs'* : scrollen bei controlled entries

Es gelingt nicht bis zum journal 'Science' zu scrollen, man muss wissen, dass es als 'Science Magazine' eingetragen ist..., gleiches gilt auch bei Autoren...

...Metadaten / Genre Diskussion

- Soll man für alle Möglichkeiten neue Genretypen erstellen? Sind andere Metadaten nötig?
- Formal sind es meistens 'journal articles'
- APA: zusätzliche Info im Titel in [], z.B. Titel [abstract]
- Kompromiss: drop-down menu mit einer standard Auswahlliste. Dann hätte man auch saubere Metadaten.

...Citation style Diskussion

- Citation style – immer individuelle Unterschiede pro Benutzergruppe ..d.h. man sucht den größten gemeinsamen Nenner für den meist benutzen Zweck, z.B Webseiten..
 - 100% dann über externe Referenzsoftware, die man selber schnell konfigurieren kann.

Priorität der Anforderungen

- Schneller...vor allem im Workspace
- Im Workspace von Submitted suchen'können
- User management / Admin tool
- Collaboration
- Alle kleinen Störungen lösen...

- Im –und export (endnote / zotero) verbessern
- Additional Activities

- **PubMan nicht komplizierter machen, es soll kein Bibliothekssystem werden, sondern Wissenschaftler sollen eingeben**

..Bemerkungen zum Schluß

- Eingabe ist einfach... so soll es auch bleiben
- Wir müssen uns einen Abstimmungsprozeß für neue Features überlegen
 - Wie legen wir Prioritäten fest
 - Voting?
 - Veto?
- Flexible Lösungen, so daß pro Context entschieden werden kann, ob ein Feature eingesetzt wird
- Bin gespannt auf Ideen Anderer!

Danke
